

# CNC TOOL / CUTTER GRINDING WORK-STATION

## CNC工具 / 刀具研磨工作站

### 工作站 車站 站

追求一個目標  
也是一個中心  
就是“準”

#### 特性 FEATURES

- 準度高、功能強、多變化。
- 研磨速度快，熱傳導係數低，不變形，提升加工件的精度穩定性。
- 可靈活快速處理各種刀具研磨，縮短加工週期，增加生產力。
- High accuracy, powerful function and maximum flexibility.
- High grinding speed, low thermal conduction coefficient combined with deformation-free greatly upgrades machining accuracy and stability.
- High Flexible to handle various tools grinding. Reduce machining cycle time and increase productivity.

本機適合重切削加工研磨  
歡迎訂製特殊規格

The machine is suitable for heavy duty grinding operations.  
Custom specifications are available.

#### CNC研磨功能 CNC grinding functions

- 中文介面、操作簡單。
- 省高額、複雜軟體費用。
- 易懂、易學。
- 操作人員可在最短的時間內製造出最完美的刀具。
- Chinese interface is easy to operate.
- Save costly and complicated software.
- Easy to understand and learn.
- Operator can produce the best possible tools in a short time.

- 可依客戶之需求而做變更。
- Available to change to meet customer's requirement.
