## EVERGREAT

生產模具材料主要為日本鋼材，並經過熱處理加硬，表面硬度極高，模具壽命可以達到30萬模次以上。

模架材料為特殊透氧鑄件，對模仁散熱及熱穩定性極佳，長期使用不變形。

排氣全部使用大排氣設計，模腔排氣順暢，並且鑄件無砂孔氣孔的問題。

Main material is Japanese steel with hardened heat treatment. Very high surface hardness on mold. The mold life can reach more than 300,000 cycles.

The mold base material is special oxygen-permeable casting part, which has excellent heat dissipation and thermal stability to the mold core, and does not deform after long-term use.

Designed with large air chill vent, the cavity exhausts smoothly, leaving no sand holes in the casting part.

Die-casting trial samle
