

Medical Grade Silicone Tube Series

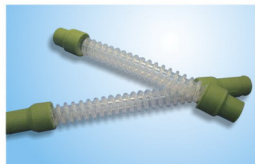

醫療級矽膠管

Medical Grade Silicone Tube

- 特性：無毒、無味、耐高溫、耐低溫、抗老化、高透明、無污染性環保材質。
- 使用環境：-40~180°C，可至250°C，可重覆消毒使用。
- 規格：有一般標準尺寸，內徑：0.5~30mm，外徑：1.5~40mm，也可客製化訂作。
- 應用領域：醫療儀器用管、實驗儀器用管、高溫蒸氣管、引流管、抽痰管、抽吸管、導尿管。

We have medical grade tubing for your general usage. We also have successfully developed several special tubing for special medical application. It is our pleasure to share them with you as below and we welcome your request for new projects cooperation.

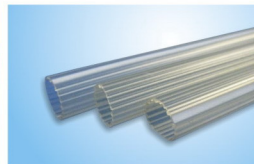

- Features: non-toxic, odorless, high temperature, low temperature resistance, aging resistance, high transparency, green material.
- SPEC: a general standard size, I.D.: 0.5 ~ 30mm, O.D.: 1.5 ~ 40mm, can be customized made.
- Working environment: -40 ~ 180°C, available up to 250°C.
- Application: medical instruments tube, laboratory equipment pipe, high temperature steam pipes, drainage pipes, suction tube, catheter.

Rapid intubation kit

\*Hardness: 60 Shore A. (If you have any request about special spec., please feel free to let us know.)

Micro tubing

Di Cheng medical grade silicone tubing is non-toxic and resistant to coagulation. They allow perfect flow and do not change, oxidize or deteriorate with time. They are non-sticking and reusable since they support 30 sterilization cycles.

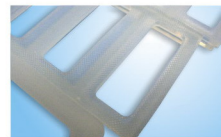

Di Cheng medical grade silicone tubing must be stored in dry places, away from light and from heat. If you follow these instructions, their shelf life is 2 years from the date of manufacturing.

客製化醫療用耗材

Medical Disposal Items

We can produce any molded products by your request. We list some of our success projects to show our special skill.

Embossed effect

Excellent hardness

Very thin effect

Liquid molding
